Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Prior art

- D1: WO 01 49664 A (WALTER HARALD ;SYNGENTA PARTICIPATIONS AG (CH); SCHNEIDER HERMANN) 12 July 2001 (2001-07-12)
D2: PATENT ABSTRACTS OF JAPAN vol. 1997, no. 10, 31 October 1997 (1997-10-31) & JP 09 144719 A (OCHIAI:KK), 3 June 1997 (1997-06-03)

2. Novelty (article 33.2 PCT)

Documents D1 and D2 disclose compounds which structurewise are quite different than those claimed in this application.

The subject matter of claims 1-10 fulfill the requirements of article 33.2 PCT.

3. Inventive step (article 33.3 PCT)

Document D1, which is considered to represent the most relevant state of the art, discloses (cf. claim 1) a family of compounds from which the subject-matter of claim 1 differs in that the core cycle is a phenyl instead of a pyrrole.

The problem to be solved by the present invention may therefore be regarded as to provide novel compounds useful as fungicides.

From the technical teachings of D1 the skilled man would not expect that by replacing a pyrrole by a phenyl the overwhole molecule would still possess fungicidal properties. The subject matter of claims 1-10 fulfill the requirements of article 33.3 PCT

4. If this application is proceeded in the european phase the Applicant would be invited to remove or clearly define the wording "substituted" in claim 1.
